

CLK

THE ADJUSTABLE HYBRID

Ideal for transitioning from your longest iron to most lofted fairway wood – with a selection of 4 lofts, each adjustable by 4 degrees. Easy to strike pure from the fairway, producing a high efficient flight – attacking tight pins from further out than ever before.

Utilizing stronger maraging steel, we are able to have a thinner face, more aggressive and flexible WAVE sole, providing faster and more consistent ball speed across the face.

David Llewellyn, Director of R&D

CLK SPECIFICATION

	CLK #2	CLK #3	CLK #4	CLK #5
Loft	14-18°	17-21°	20-24°	23-27°
Lie	41"	40.5"	40"	39.5"
Length	55.5-58.5"	56-59"	56.5-59.5"	57-60"

Dexterity: CLK #2 and #5 RH only, CLK #3 and #4 RH & LH

EXTEND YOUR LONG GAME: A new MAS1C Maraging Face Allows greater energy transfer and faster ball speeds from across the clubface.

ATTACK TIGHT PINS: New dual wave and wider profile encourage a higher flight and steeper landing angles.

TOTAL CONFIDENCE: A wide, flat crown breeds confidence at address – encouraging a more positive swing.

PURE AT IMPACT: A collection of structural refinements to achieve a more tour preferred, solid sound at impact.
