

ST-Z

ULTRA-STABLE WITH LOW SPIN EFFICIENCY

ST-Z FAIRWAY WOODS

A throwback profile – with curves for the purist and performance for the pragmatist. Mizuno's 3rd generation MAS1C face is Mizuno's most powerful to date. A balanced package of low spin performance and stability – not common in most fairway woods. With adjustable hosel in both 3 and 5 wood.

The fairway wood might be the least regularly changed club in any bag – so we spent a lot of time looking at older models that our tour players had hung onto over the years. It ended with a lot of really subtle touches on the ST-Z – leading edge, transition into the hosel. There's a lot to like at address.

Chris Voshall, Product Manager

ST-Z FAIRWAY WOODS SPECIFICATION

	ST-Z 3W	ST-Z 5W
Loft Range	15.0 (13.0-17.0)°	18.0 (16.0-200)°
Length	43"	42.5"
Dexterity: ST-Z 3W RH and LH, 5W RH only		

MAS1C MARAGING FACE: With optimized CORTECH multi-face thickness. Our thinnest and hottest FW face to date.

ULTRA-LIGHTWEIGHT CARBON CROWN: Lowers the COG for better spin vs MOI performance

RE-ENGINEERED WAVE TECHNOLOGY: Compact Wave design lowers the mass contribution allowing for higher MOI and lower Center of Gravity.

QUICK SWITCH 3 & 5 WOOD: Provides 4 degrees of loft and face angle adjustability
